

For over 50 years, Projects Inc. has been a leading worldwide provider of precision machined parts, pressure probes, resistance temperature detectors, thermocouples, and custom instrumentation. We offer an exceptional benefits package with matching 401K, profit sharing, monthly shipping bonus and tuition reimbursement. Projects is growing and is currently searching for qualified candidates to fill the following position – **Quality Inspector:**

### **SUMMARY**

The Quality Inspector will provide support to achieve optimal levels of productivity and quality to assure parts and components are manufactured in accordance with the appropriate drawings and specifications. The ideal candidate will possess a trained eye for detail and will be reliable and committed. This person will utilize quality equipment to verify good quality parts are being produced and to assist in quality documentation and processes.

### **ESSENTIAL FUNCTIONS AND RESPONSIBILITIES**

To perform this job successfully, an individual must be able to perform each essential duty satisfactorily.

- Perform complex dimensional layout inspection to operations sheets and blue prints.
- Must be proficient in the use of inspection equipment (calipers, micrometers, etc.)
- Ability to read and understand part drawings and designs.
- Must have basic GD&T knowledge.
- Assist with documentation and prepare dimensional reports for FAI, PPAP, and Qualification Packages.
- Ensure all inspections are properly performed and documented and all records properly completed.

### **QUALIFICATIONS:**

The appropriate candidate will have the following qualifications to successfully perform the job;

- GED/High School Diploma and a minimum 3 years of experience as an inspector in a manufacturing setting.
- Strong mathematics knowledge and a solid understanding of statistical process control.
- Proficient in computer applications.
- A keen eye for detail and a results-driven approach.
